

BACKGROUNDER

Gunskirchen, Austria, April 19, 2019 – The Rotax Certification Program consists of three main courses. The Advanced Maintenance Course is limited specifically to the Rotax service network, whereas the Basic Maintenance Course, comprising of the OTS module = outside the seal and the ITS module = inside the seal, is also open to our Rotax customers.

The Basic Maintenance Course content combines both modules into a week-long format primarily designed for technicians and Rotax engine owners interested to learn more about achieving maximum performance and reliability from the Rotax powerpack.

THE RCP TRAINING COURSES

ADVANCED MAINTENANCE

High-class technical course for experts.

Comprehensive MAX and DD2 overhaul according to factory standards.

BASIC MAINTENANCE: ITS MODULE

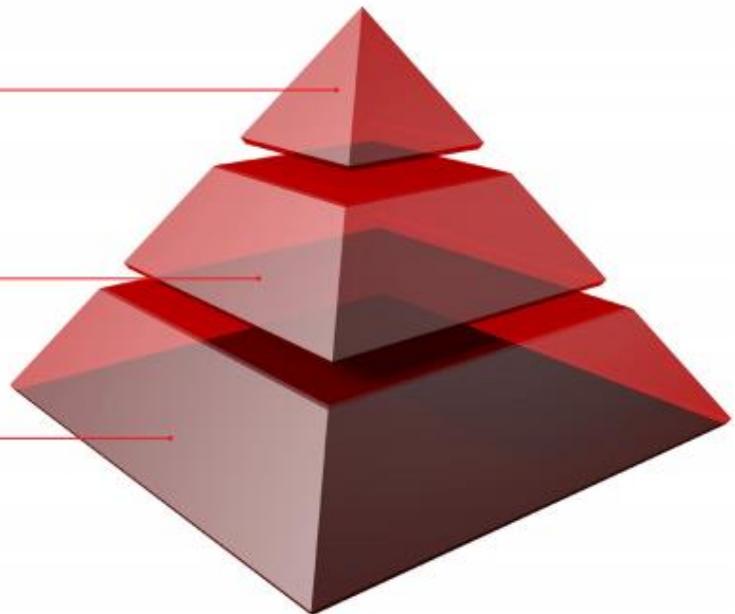

Course for skilled technicians.

Top end maintenance and scrutineering basics.

BASIC MAINTENANCE: OTS MODULE

Entry level course for interested technicians.

Getting familiar with the engine, carburetor setup and basic engine maintenance.

**The Trainer:**

Steve Ogden has won numerous championships together with his partners; including British, European and World titles. He understands the Rotax product range and how important it is to be competent in the correct assembly and service of engines to factory specifications, for the optimum performance and reliability. As a former technology teacher himself during the 90's, Steve Ogden will personally be conducting the technical training courses for the Rotax Certification Program at the Rotax Training Centre in Boroughbridge, United Kingdom.
